Project Title: NASA Website

I'd like to build this site as a collection of pages. I would like to see the space theme come out in the design but not to overwhelming, subtly adding some space icons would be a nice touch. I would like pictures to be the center of the design, with the rest having a clean look and feel.

- **Home Page/Introduction** – Introduce what NASA is with maybe a collection of their logos
- **History**- History of NASA's programs and possibly some missions. Very open-ended, there could be a timeline of missions or just some historical information about the organization.
- **Facilities** - I'm thinking a list of the NASA locations around the US, with their main sector of work, time founded, and location
- **Goals** – list of the organization's goals
- **Gallery** – catalog with some pictures captured by NASA in space or of their space equipment
- **Sources** – this page will just list sources, including the Wikipedia page, as well as other sources for photography, and any other credits that need to be provided.
