

Hi Ashley,

Most of my suggestions remain kind of similar as last time.

- I think the homepage can have a bit more hierarchy to create more visual interest
- The navigation bar could stand out a little bit more maybe by a color differentiation between the navigation bar and the page content
- The pictures are defiantly better quality!
- I would go through all the test and take out the random numbers in the square brackets so it doesn't look like you copied it directly from Wikipedia

Good luck on the rest of your semester!

Best,  
Nina C
